

TRAINING OVERVIEW

Kanban System Design (KMP-1)

2 DAYS TRAINING

Certification KMP 1

Venue: Virtual or In Person training

Course Overview

Kanban System Design, which teaches the basics of Kanban, flow, and how to design a Kanban system.

What You Will Learn

- Understand the basics, motivation, and benefits of The Kanban Method.
- Learn how to utilize key metrics such as Lead Time, Run Charts, and Cumulative Flow Diagrams to make continuous improvements.
- Understand “Pull” systems and how they help reduce overburdening.
- Become faster and more responsive, with better risk management and governance.
- Build and design a Kanban system using the STATIK approach.
- Learn how to run the Kanban meetings to focus on the work and allow the team to organize around it.
- Experience flow in a simulation of a Kanban system.

Course Details

- Attendees are expected to have read “Kanban” by David J Anderson or “Kanban from the Inside” by Mike Burrows.
- Students completing this course and the Kanban Systems Improvements course receive the Kanban Management Professional (KMP) credential.
- Participants will receive a certificate of completion for the Kanban System Design course.
