

TRAINING OVERVIEW

SAFe DevOps

2 DAYS TRAINING

Certification

SAFe DevOps

Venue: Virtual or In Person training

Course Overview

Delivering valuable solutions faster doesn't involve just engineers developing software. It involves introducing a shared DevOps mindset among all the people who define, build, test, deploy, and release software-driven products.

What You Will Learn

- How to incorporate continuous testing and continuous security into the delivery pipeline
- How to integrate continuous exploration, integration, and deployment, and release value to end users on demand
- How to design and implement an actionable DevOps transformation plan tailored to your organization
- How to evaluate and improve your current state using tools like the DevOps Health Radar and Transformation Canvas

SAFe® DevOps answers the questions:

- What is DevOps and how does it enable strategic business objectives?
- What are the mindset, culture, and technical practices to successfully define, build, test, deploy, and release?
- How do I use value stream mapping to measure flow and spot bottlenecks in the delivery pipeline?

What's included

- Course workbook and SAFe Studio access to help you prepare to take the certification exam, claim your digital badge, and tools to get started in your SAFe role
- Remote learning via SAFe® Virtual Classrooms
- One-year membership to SAFe Studio with your first class attendance
- Value Stream Mapping workshop
- Platform access to e-learning modules and curated members-only content to support your SAFe transformation
- Member discussion forms to engage in ongoing conversations on the SAFe framework or how to better perform as part of an Agile Team
- Curated content-playlists based on your interests and roles, including templated resources and facilitation guides to get you started
- Access to content, tools, and resources you need to practice SAFe every day
- SAFe DevOps certification exam
